CAREER OBJECTIVE

Motivated and detail-oriented Computer Science student entering the third year of study, with a strong interest in Data Science, Machine Learning, and Analytics. Enjoys exploring data, uncovering patterns, and turning information into actionable insights, with growing hands-on experience in Python, SQL, Power BI, and predictive analytics. Seeking opportunities to apply technical and problem-solving skills, gain industry exposure, and contribute to data-driven solutions in areas such as predictive analytics, sports analytics, AI, and business intelligence.

EDUCATION

S.I.V.E.T College, Chennai | June 2024 – May 2027

Bachelor of Science – Computer Science with Artificial Intelligence | 87% in last semester

EXPERIENCE

DATA SCIENTIST INTERN

Big Bucks Innovation Pvt. Ltd. | *Chennai* | *May 2026 – June 2026*

- Worked on data preprocessing, cleaning, and exploratory data analysis (EDA) using Python, Pandas, and NumPy.
- Developed and evaluated machine learning models for predictive analytics using Scikit-learn.
- Created data visualizations with Matplotlib and Seaborn to identify trends and support decision-making.
- Assisted in building interactive Power BI dashboards for business reporting and performance analysis.
- Wrote SQL queries to retrieve, filter, and analyze structured data from relational databases.
- Collaborated with the development team to deliver data-driven solutions and gained hands-on experience with the end-to-end data science workflow.

PROJECTS

Power BI Projects

- **IPL Orange Cap & Purple Cap Analysis Dashboard — Built an interactive Power BI dashboard tracking top runscorers (Orange Cap) and top wicket-takers (Purple Cap) across IPL seasons, with player-wise and team-wise performance breakdowns.**
- **Amazon Sales Dashboard (Minimal Dataset) — Designed a Power BI dashboard analyzing sales trends, category-wise performance, and revenue insights from a curated Amazon sales dataset.**
- **Educational Performance & Resource Allocation Dashboard — Built a Power BI dashboard on a Kaggle school-education dataset covering 50 schools across 4–5 states and 10,000+ students, analyzing budget allocation, average scores, scholarship eligibility, dropout risk, subject-wise performance, teacher experience, teacher-to-student ratio, and demographic factors (age, gender, district) to surface resource-to-performance correlations.**

Machine Learning Projects (Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)

- Student Performance Predictor — Developed a machine learning model to predict student academic performance using educational and behavioral data.
- House Price Prediction — Built a predictive model to estimate house prices based on property features and market trends.

- Loan Approval Prediction — Created a classification model to predict loan approval status using applicant financial and demographic data.
- Employee Attrition Prediction — Developed a machine learning model to identify employees at risk of leaving the organization and support retention strategies.

CERTIFICATIONS

- Python for Data Science – NPTEL / IIT Madras (Elite · 62%)
- Analyzing and Visualizing Data with Microsoft Power BI
- IBM Certified Data Fundamentals
- Deloitte Australia – Data Analytics Job Simulation
- Python For Data Science – Cognitive Class / IBM
- Web Development Fundamentals

SKILLS

Technical Skills: Python, SQL, Java, HTML, CSS, Power BI, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Git, GitHub, Microsoft Excel, PowerPoint

Core Concepts: Data Analysis, Data Visualization, Exploratory Data Analysis (EDA), Machine Learning, Data Cleaning, Statistical Analysis, Predictive Analytics, Business Intelligence

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Leadership, Time Management

LANGUAGES

Tamil, English
